

IBDoc[®] Calprotectin Home Test

Patients' preferred tool for IBD monitoring

High correlation with endoscopy and laboratory assays

Increased patient compliance over conventional laboratory test

First IVDR approved fCAL home test

HL7 and RESTful integration into electronic healthcare records

1. Stool sampling

Benefits of the home test include a reduction of the burden on hospital laboratory resources and a more patient-friendly sampling technique¹

2. Sample loading

88% agreement between patient performed IBDoc[®] results and ELISA reference measurements²

Strong correlation between IBDoc[®] and endoscopic activity and histopathology³

3. Test cassette scanning

Patient Usability scores are above 80 out of 100⁴

Software and Instruction for Use are available in 20+ languages

Get our
smartphone list

4. Uploading to healthcare practitioners

The patient choice: 85% of patients prefer IBDoc[®] over conventional calprotectin measurements⁵
